

Assertive Leadership™

INVEST IN YOURSELF & YOUR TEAM TO REACH ORGANIZATIONAL EXCELLENCE

Assertiveness is the quality of being self-assured and confident *without* being aggressive. It is a learnable skill that helps you be true to yourself, express yourself in a positive way and be open to criticism and compliments. While being assertive is just one of many skills leaders need to be successful, being assertive has the power to magnify many other leadership strengths.

“*Assertive Leadership™ helps you lean in to be the best leader you can. Fostering teamwork and collaboration, allowing teams to thrive*”

When leading change, there will undoubtedly be resistance. Assertive Leadership™ allows you and the team to address resistance head-on in an open and constructive manner. By allowing everyone their right to be heard in a constructive and empathetic manner, you gain buy-in and are enlightened to unintended consequences that previously would have been waiting, lurking in the shadows to take you down.

At Baskett, we bring experience in successful leadership and a proven track record in transforming organizations. Our customized strategic advising services will help you bring your organization to the next level.
